EKBT1500

Knotting Beam Trolley

Helps to load warp beams into the looms easily

- Up to 1500 kg
- Battery operated drive and hydraulics

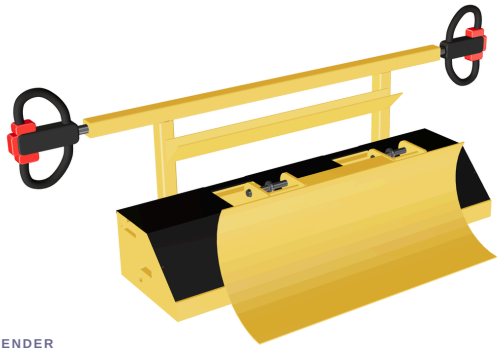

ESBT 2000

Low Lift / Sizing Beam Trolley

Helps to lift and transport Beams off the ground.

- Up to 2000 kg
- Battery operated drive and hydraulics

3D RENDER

ECRT 700

COMING SOON

Cloth Roll Trolley, Electric

Helps lift and move Cloth rolls / doffs with ease.

- Up to 700 kg
- Battery operated drive and hydraulics

3D RENDER

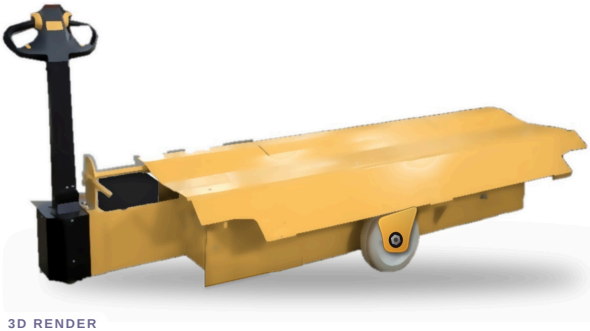

EPT 5000

COMING SOON

Puller Trolley

Helps transport A-frames. It can lift up to 3 tonnes and pull up to 5 tonnes.

- Lifts up to 3000 kg · pulls up to 5000 kg
- Battery operated drive and hydraulics

3D RENDER

EBBT 2000

COMING SOON

Big Batch Transport Trolley

Transports batch rolls from the batching machine to the inspection stand or the floor. No lifting.

- Up to 2000 kg
- Battery operated drive

MCRT 500

Manual Cloth Roll Trolley

Helps lift and move Cloth rolls / doffs

- Up to 550 kg
- Manual hydraulic lift

MEBT

Empty Beam Trolley

Helps in lifting and transport empty beams with ease.

- Up to 300 kg
- Manual hydraulic lift

FIELD TESTED

Built on the shop floor. Proven in the mill.

WHAT YOU GET

- Made to order: every dimension fits your beams, alleys and floor
- LiFePO4 batteries; fast charger and swappable batteries available
- Designed in SolidWorks, checked by FEA before fabrication

TO QUOTE, SEND US

- Beam flange or cloth roll diameter (full and empty)
- Beam or roll length, and approximate weight
- Alley width, and loom width where relevant

MADE TO ORDER

Don’t see your load?

Every trolley is built around your beams, alleys and floors. Send us the beam or roll dimensions and weight, and we will propose the right one.
